Rocksolar 8-Inch 6AWG Battery Interconnect Cable User Manual

Thank you for choosing the Rocksolar 8-inch 6AWG Battery Interconnect Cables. These cables are designed to provide secure and reliable connections for your devices. Please follow the instructions below to ensure safe and efficient usage.

Package Content:

1. Rocksolar 8-inch 6AWG Battery Interconnect Cable - Red
2. Rocksolar 8-inch 6AWG Battery Interconnect Cable - Black

Connecting to the Rocksolar LiFePO4 Battery:

1. **Safety Precautions:** Before starting the connection process, ensure that all devices are switched off. Always handle the cables with clean, dry hands.
2. **Locate the Battery Terminals:** Identify the positive (+) and negative (-) terminals on your Rocksolar LiFePO4 battery. They are typically color-coded: red for positive and black for negative.
3. **Connect the Cables:** Take the red Rocksolar 8-inch 6AWG Battery Interconnect Cable and connect it to the positive terminal on the battery. Similarly, connect the black cable to the negative terminal.
4. **Secure the Connection:** Ensure that the connections are secure and there's no movement at the connection points. Loose connections can lead to power losses and potential safety risks.
5. **Connect to the Device:** Repeat the process to connect the other ends of the interconnect cables to your device. Remember to match the color of the cable to the color of the terminal.
6. **Check the Connections:** Double-check all connections to ensure they are secure. If everything is properly connected, your device is now ready to be powered by the Rocksolar LiFePO4 battery.

Safety and Maintenance:

- Do not use the cables if they show any signs of damage. Contact our customer support for assistance.
- Keep the cables away from sharp objects, high temperatures, and liquids.
- Regularly inspect the cables for any signs of wear and tear.
- For best results, ensure the connections are always secure and clean.
